About me

I am a passionate Web and Mobile Developer with a strong foundation in building dynamic and responsive applications. I thrive on challenges and am constantly eager to learn and adopt new technologies to stay at the forefront of industry trends. My commitment to continuous learning and my ability to adapt quickly make me well-equipped to tackle any development task and contribute effectively to a forward-thinking team.

Experience

- **Software Engineer (Mobile Developer)** *Colombo, Sri Lanka*
  IntendAble ***Jan 2024 - Present***

• An organization engaged in developing community-driven projects, open-source research initiatives, and providing freely accessible public datasets.
• Regularly responsible for mobile development on several client projects.

Technologies used: Dart, Flutter, GetX, SpringBoot, Google Map API, PostgreSQL, MySQL and Firebase

Education

– **University of Colombo School of Computing** *Colombo, Sri Lanka*
Bachelor of Science - Computer Science; CGPA/Percentage: 3.18/4.00 ***May 2021 - Present***

– **Suriyawewa National School, Hambantota**
G.C.E. Advanced Level Results Combined Maths: A, Chemistry: A, Physics: C ***2006 - 2020***

Projects

– **EchoLynk - Communication Software Solution** ***Apr 2024 - Present***

An innovative and accessible software solution that addresses the communication challenges faced by Deaf and Mute individuals. System have contextual text suggestions and visual cues for understand to the words and integrate the sign language detection model.

∗ Tools & technologies used: Android Native (Java, XML), SQLite, Generative AI, React Js, SpringBoot (Java)

– **Amoral Clothing - Online Commerce and Workforce Management System** ***Jun 2023 - Apr 2024***

Develop a website to revolutionize the way to handle online orders, deliveries, employee and Stock management, T-Shirt Designing Feature and generate insightful reports.

∗ Tools & technologies used: HTML, CSS, JavaScript, MVC

– **Online School Mobile App Development** ***Jul 2023 - Sept 2023***

Developed a cross-platform mobile application with sortable online course views and scheduled classes that students can join and integrated a payment gateway for class payments. Dynamically managed class capacities.

∗ Tools & technologies used: Flutter, EmailJs, GetX, Firebase

– **Public Transport Departure Alert Mobile App Development**

Developed a mobile app to enhance public transportation. Integrated Google Maps for marking departure locations and implemented an alarm system to wake users at their stops. Users can save frequent locations and view their current location in real-time.

∗ Tools & technologies used: Flutter, GetX, SQLite, Google Maps API

Skills and Interests

Languages: Dart, Python, PHP, Java, Swift, HTML, CSS, XML, JavaScript, C and C++
Frameworks: Flutter, React JS, Spring Boot, Node Js, Tailwind CSS
Databases and ORMs: MySQL, SQLite, PostgreSQL, Firestore, MongoDB, Chroma
Other Technologies: Git, Linux, Figma, Jira
Soft Skills: Communication, Problem-solving, Time management, Adaptability, Teamwork and Leadership
Areas of Interest: Mobile Development, Machine Learning, Networking

Positions of Responsibility

- **Vice President,** IEEE Computer Society Student Branch Chapter Of UCSC ***Present***
- **CodeGen - Coordinator,** UCSC Career Fair ***2024***
- **Volunteer Team,** GDG Cloud Connect Organized by IEEE CS SB Chapter of UCSC ***2023***
- **Program Team Coordinator,** IntelliHack 3.0 Organized by IEEE CS SB Chapter of UCSC ***2023***

Achievements

- **MadHack,** Finalist Team ***2024***
  A Mobile Application Development Hackathon organized by IEEE SB of UCSC.
- **AI-Driven Sri Lanka** ***2023***
  A Genarative AI Application Development Hackathon organized by IEEE SB of IIT.

Certificates

- **Foundations of Flutter Development,** Google (Coursera)
- **AWS Educe Introduction to Cloud,** Amazon Web Services (AWS)
